

The NVS-10 is a stand-alone network video server for both video and audio streaming through ethernet in real-time.

Designed for live streaming, the NVS-10 is a true plug-and-play device. Simply connect your video & audio source to the NVS-10, and enjoy video in MPEG-4 format via Internet Explorer 6.0 or higher web browser.

It is perfect for application within education, worship, or corporate settings where a ethernet network is in place.
